1. Guideline of Management of Hypercyanotic spells

1.1 Introduction

Hypercyanotic spells can occur in patients with uncorrected Tetralogy of Fallot and other abnormalities where there is dynamic right ventricular outflow tract obstruction and a ventricular septal defect. Such spells are often mild but are potentially very dangerous and patients can deteriorate rapidly. The cascade of therapeutic action is dependent upon the response to treatment.

Tetralogy of Fallot (TOF) is a congenital heart defect. TOF is characterized by four structural changes; ventricular septal defect, stenosis of the right ventricular outflow tract (RVOT), stenosis of the pulmonary valve, an aortic root that overrides both ventricular outflow tracts and a secondary right ventricular hypertrophy.

1.2 Scope

This guideline applies to all infants with uncorrected Tetralogy of Fallot and other abnormalities where there is a dynamic obstruction to flow of blood from the right ventricle to the lungs.

1.3 Purpose

The purpose of this guideline is to provide a standardised approach to the management of hypercyanotic spelling in neonates/infants with uncorrected Tetralogy of Fallot and other abnormalities where there is dynamic obstruction of flow of blood from the right ventricle to the lungs.

Section 1 Organisational Policy	Current Version is held on the Intranet	First ratified: March 2021	Review date: March 2026	Issue 1	Page 3 of 12
---------------------------------------	--	-------------------------------	----------------------------	------------	--------------

1.4 Definitions

The cascade of therapeutic action is dependent upon the response to treatment.

Mild: the baby may appear pale, grey blue and may be clammy, with tachypnoea. Oxygen saturations will be lower than usual.

Severe: On examination the right ventricular outflow tract murmur may be absent or short in duration. Loss of consciousness or 'dropping off to sleep' may be seen due to poor systemic perfusion.

1.5 Presentation:

The baby may appear pale, grey blue and may be 'clammy'

Tachypnoea (rapid shallow breathing)

Peripheral oxygen saturations will be significantly lower than the baby's usual measurement.

On examination the RVOT murmur may be absent or short in duration.

Loss of consciousness or 'dropping off to sleep' can be seen if there is poor systemic perfusion.

1.6 Potential triggers or predisposing factors:

Can be triggered by a variety of stimuli (distress, crying, dehydration, defecation or straining, fever, tachypnoea, anaesthetic agents, cardiac catheterisation) but may also occur without any reason.

Section 1 Organisational Policy	Current Version is held on the Intranet	First ratified: March 2021	Review date: March 2026	Issue 1	Page 4 of 12

1.7 Management

Mild Hypercyanotic spell

Always assess infant using the ABCDE principles

Call for help. In mild cases, position on parent's/carer's shoulder with the knees tucked up underneath. (This calms the infant, increases systemic venous return and increases systemic vascular resistance)

Reassess using ABCDE principles. Administer 100% oxygen via non re-breath bag valve mask if necessary. Monitor oxygen saturations and ECG.

If no response to above, call for help, inform consultant.

If stable, give oral Morphine 0.1 mg/kg

Site IV cannula – check venous blood gas

Give IV 0.9% Sodium chloride 20mls/kg in aliquots of 10mls/kg

Give IV Morphine 0.1mg/kg as a bolus (can be repeated)

Use IM or subcutaneous route if IV access not readily available

Monitor neurological and respiratory status as morphine has respiratory depressant effects

If no response to above

Give IV Propranolol 0.1mg/kg as a bolus

Monitor for bradycardia

Deterioration

Contact STRS retrieval Team 020 7188 5000

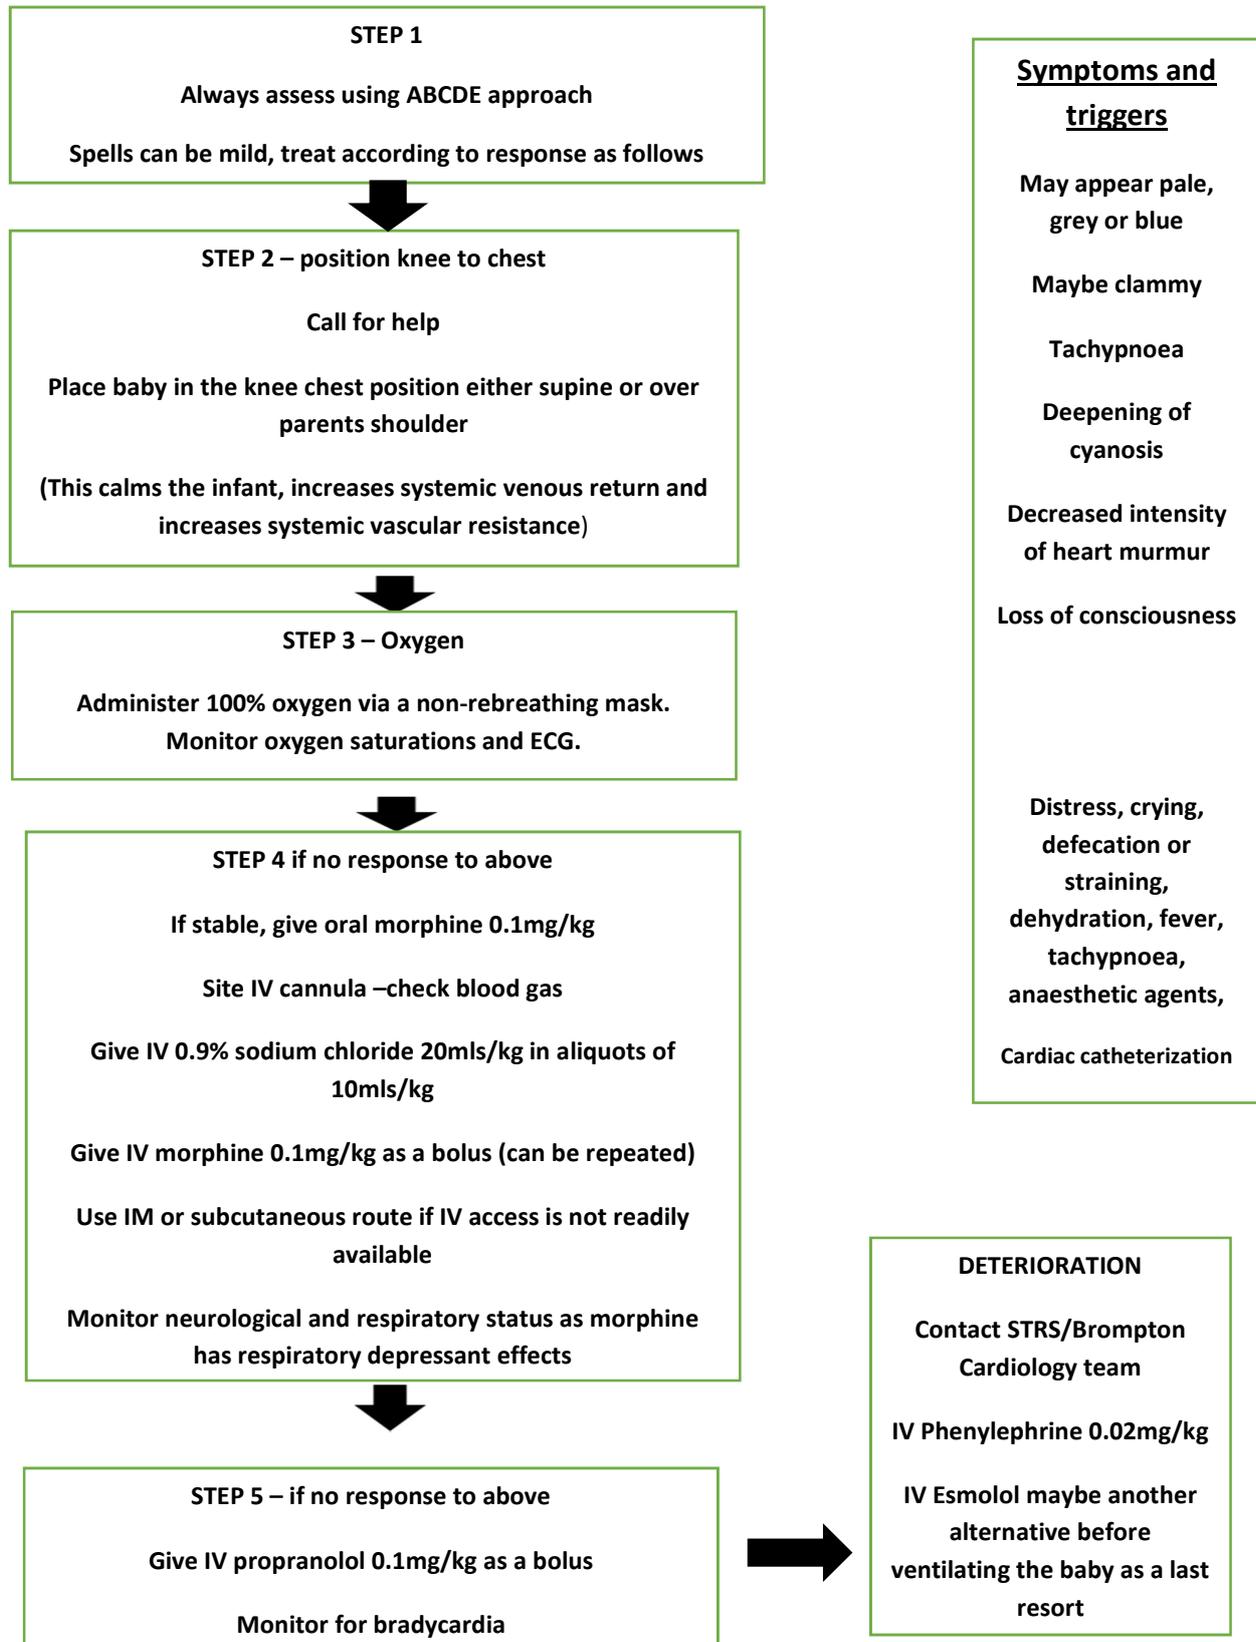

**Contact the Paediatric cardiology registrar at the Royal Brompton Hospital
020 7352 8121(switchboard)**

IV phenylephrine 0.02mg/kg (This is used to increase SVR)

IV Esmolol infusion maybe another alternative before ventilating as a last resort

2. Guideline Governance

a. Scope

This guideline is relevant to all staff caring for all children from 0-18 years old across the emergency department, inpatient ward and outpatient department.

b. Purpose

- i. This guideline aims to facilitate a common approach to the management of children. At times deviation from the guideline may be necessary, this should be documented and is the responsibility of the attending consultant.
- ii. This guideline is subject to regular review to ensure ongoing evidence based practice.

c. Duties and Responsibilities

All healthcare professionals responsible for the care of all children 0-18 years should be aware of practice according to this guideline.

d. Approval and Ratification

This guideline will be approved and ratified by the Paediatric Guidelines Group.

e. Dissemination and Implementation

- i. This guideline will be uploaded to the trust intranet 'Paediatric Guidelines' page and thus available for common use.
- ii. This guideline will be shared as part of ongoing education within the Paediatric Department for both medical and nursing staff.
- iii. All members of staff are invited to attend and give comments on the guideline as part of the ratification process.

f. Review and Revision Arrangements

- a. This policy will be reviewed on a 5 yearly basis by the appropriate persons.
- b. If new information comes to light prior to the review date, an earlier review will be prompted.
- c. Amendments to the document shall be clearly marked on the document control sheet and the updated version uploaded to the intranet. Minor amendments will be ratified through the Paediatric Guidelines Group. A minor amendment would consist of no major change in process, and includes but is not limited to, amendments to documents within the appendices.

g. Equality Impact Assessment

<p>Background</p> <ul style="list-style-type: none"> Who was involved in the Equality Impact Assessment
<p>Author and the supervising consultants.</p>
<p>Methodology</p> <ul style="list-style-type: none"> A brief account of how the likely effects of the policy was assessed (to include race and ethnic origin, disability, gender, culture, religion or belief, sexual orientation, age) The data sources and any other information used The consultation that was carried out (who, why and how?)
<p>All groups of staff and patients were taken into consideration and there is no bias towards or against any particular group.</p>
<p>Key Findings</p> <ul style="list-style-type: none"> Describe the results of the assessment Identify if there is adverse or a potentially adverse impacts for any equalities groups
<p>There is no evidence of discrimination.</p>
<p>Conclusion</p> <ul style="list-style-type: none"> Provide a summary of the overall conclusions
<p>There is no evidence of discrimination.</p>
<p>Recommendations</p> <ul style="list-style-type: none"> State recommended changes to the proposed policy as a result of the impact assessment Where it has not been possible to amend the policy, provide the detail of any actions that have been identified Describe the plans for reviewing the assessment
<p>This guideline is appropriate for use.</p>

h. Document Checklist

To be completed (electronically) and attached to any document which guides practice when submitted to the appropriate committee for approval or ratification.

Title of the document: Management of Hypercyanotic spells

Policy (document) Author: Dr Matthew Sobowale

Executive Director: N/A

		Yes/No/ Unsure/NA	<u>Comments</u>
<u>1.</u>	Title		
	Is the title clear and unambiguous?	Yes	
	Is it clear whether the document is a guideline, policy, protocol or standard?	Yes	
<u>2.</u>	Scope/Purpose		
	Is the target population clear and unambiguous?	Yes	
	Is the purpose of the document clear?	Yes	
	Are the intended outcomes described?	Yes	
	Are the statements clear and unambiguous?	Yes	
<u>3.</u>	Development Process		
	Is there evidence of engagement with stakeholders and users?	Yes	
	Who was engaged in a review of the document (list committees/ individuals)?		Royal Brompton Cardiology Dept
	Has the policy template been followed (i.e. is the format correct)?	Yes	
<u>4.</u>	Evidence Base		
	Is the type of evidence to support the document identified explicitly?	Yes	

Section 1 Organisational Policy	Current Version is held on the Intranet	First ratified: March 2021	Review date: March 2026	Issue 1	Page 10 of 12
---	--	--------------------------------------	-----------------------------------	------------	---------------

		Yes/No/ Unsure/NA	<u>Comments</u>
	Are local/organisational supporting documents referenced?	Yes	
5.	Approval		
	Does the document identify which committee/group will approve/ratify it?	Yes	
	If appropriate, have the joint human resources/staff side committee (or equivalent) approved the document?		
6.	Dissemination and Implementation		
	Is there an outline/plan to identify how this will be done?	Yes	
	Does the plan include the necessary training/support to ensure compliance?	Yes	
7.	Process for Monitoring Compliance		
	Are there measurable standards or KPIs to support monitoring compliance of the document?	No	
8.	Review Date		
	Is the review date identified and is this acceptable?	Yes	
9.	Overall Responsibility for the Document		
	Is it clear who will be responsible for coordinating the dissemination, implementation and review of the documentation?	Yes	
10.	Equality Impact Assessment (EIA)		
	Has a suitable EIA been completed?	Yes	

Committee Approval (Paediatric Guidelines Group)

If the committee is happy to approve this document, please complete the section below, date it and return it to the Policy (document) Owner

Name of Chair	Dr Claire Mitchell	Date	<u>06/05/2021</u>
----------------------	---------------------------	-------------	--------------------------

Ratification by Management Executive (if appropriate)

If the Management Executive is happy to ratify this document, please complete the date of ratification below and advise the Policy (document) Owner
